

I would be lost without XM radio. I live in an area that receives no radio or TV reception. XM radio weather and traffic has helped me on the road to avoid problem roads and weather. It provides me with access to news and music. We pay for this service and this is supposed to be a competitive capitalistic society. Therefore, the National Association of Broadcasters has no right to try to dictate what I am permitted to hear. I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that we deserve and expect. Thank you.
